We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, American Express, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

They Don't Measure Weather

We've got hemostats, and sure, they sound like an instrument that could tell you something about the weather. But, no. They're for doctors, to stop the bleeding during medical procedures. At 5-1/2" long, hemostats look like scissors, but docs use them to pinch blood vessels, relying on (3) different latch locks by the finger loops. What would you use them for? Anything you need to pinch and hold for a while. It's not brain surgery.

78124 5-1/2" Hemostat \$2.75/each

Diamonds Are Forever

So you won't want to lose this 6-piece set of diamond burrs. They're on 1/4" shanks, and are 2-1/4" to 2-3/8" long OA, with approx 1/2" dia heads. Pinnocchio Pliers

These high-quality 8" long nickel-plated pliers from Tolsen Tools have an extra long nose, even when they're telling the truth, and, as you know, pliers never lie. The 3" long jaws finish with a 1/2" gripper section and another side-cutter section. Also have coated plastic handles.

97091 Tolsen Long-Nose Pliers \$8.95/each

Croissant Wrenches

They're lousy for breakfast, even with some nice raspberry jam on them, but they're essential in the mechanic's game. Anyway, these adjustable necessities come in a 3-pack—6", 8", and 10"—with foam, non-slip handles for your workshop comfort. From Grand Rapids Industrial Products, aka GRIP® Tools.

97317 Adjustable Wrench 3-Pk \$10.95/each

Might As Well Be Magic

Yes, there's a scientific explanation, but we prefer to think this magnetizing/demagnetizing tool relies on magic. Stick a screwdriver head in the bottom, it's magnetized. Stick it in the top, it's demagnetized. Fun for the whole family. Measures 2" square x 1-1/4" with stair-step ports for blades of different sizes. Never drop a screw again.

97089 Tolsen Mag/Demag Tool \$3.95/each

One-Handed Pliers

Look, Ma, one hand! These 10" Powerbuilt® wrenches have spring-loaded, self-adjusting jaws made to bite, hold and turn virtually anything—round, flat, hex or oddly shaped—that will fit. The jaws open to 2-3/8" apart and remain parallel. Designed so the jaws will generate 4X the clamping power of the ANSI pliers standard. Unlike you, its jaws have hardened steel teeth. Good to have a few in the garage, workshop and camper.

47752 Powerbuilt® Wrench \$12.50/each

Got Bolts That Need Cutting?

You say your ex locked your bike to a fence just to be cruel? We've been there. Worry no more. From Tolsen Tools, this 8" long mini bolt cutter is compact and ready to slice through steel. This Is The End (Cutter)

Everything from Tolsen Tools is solid, and that includes this 8" long end cutting pincer tool with 1-3/16" jaws. It's made of chrome vanadium steel, and you should get one for that reason alone. Not to mention the soft and grippy rubber-coated handles. Damn, we love quality tools.

Cyrano de Bergerac Pliers

Extremely long nose pliers for when the object of your pliering is out of reach. Measure 11" from grips to tip with 3-1/4" jaws, grippy for the last 2". They have rubberized handles, too, in case there's electricity at the business end. This is the tool you didn't know you'd need, but you're glad you finally got.

48694 Long Long Nose Pliers \$9.50/each

Attach Anything!

You need this. Anybody who's ever made a third trip to the hardware store on the same day needs this. The (100) -- count 'em, (100) -- chrome vanadium driver and bit attachments include slotted, Phillips, square (Robertson) head, torx, hex and 12-point bits, plus security Phillips, torx and hex, and (4) different driver adapters (one of which, a super-cute cup-hook driver, has us oddly excited). They're all in a flip-top plastic case. How come it's surplus? If you turn it upside down and shake it, some of the bits fall out of their little size-marked slots. So don't do that. Or stick a thin sheet of foam inside it and all will be well.

92581 100-Pc Bit Set \$13.75/each

Electric Styro Knife

Cut Right To It

This all-purpose scissors is the favorite of everyone at A.S.&S.: Pat uses his to cut and strip wire. C.J. uses his to slit the tape on packages. Mary Ann uses hers to open bags of pretzels. It's 6-1/4" long overall, with a very sharp 2" stainless steel blade and large, comfortable handles. (Colors will vary). It would sell for \$9.95 retail if it was new, but it was used for one day to cut cloth in the assembly plant of a major car company, then discarded. Quality control is a wonderful thing.

Bone Up On Anatomy

You're not going to blow money on an actual human skeleton, are you? Consider that for a tenth of the price you can get an anatomically accurate skeleton done in plastic. This model is male (judging by the hips) and has many articulated joints—jaw, shoulder, knee, etc. Its small size (33") makes it practical for classroom use, since it can be passed around the room. Other nice touches include discrete neck vertebrae, a sectioned skull, and very little "flash" from the plastic molds. It also comes with a metal display stand, weighted at the bottom to prevent spills. Yes, some concessions had to be made because of the size and price, but this is still an invaluable teaching tool, and quite a nice decoration for those with morbid minds.

It's Sandy the spinning seal! From Z Classic Wind Ups™, Sandy spins clockwise, bobs up and down and spins her ball on her nose. Arms and tail move, too. Measures approx 8" x 5" x 3", in teal and silver with a red ball adorned with a festive yellow star. All kids love wind-ups at some point in their lives. Great as kitschy adult decor, too.

Prehensile Pine Cones

But cute. The pangolin is the most illegally trafficked animal in the world, because people think pangolin scales cure diseases. It's worse than having a rhino horn. They're nice little critters, actually, like armadillos with better armor, and they eat bugs and curl up in a ball when threatened, like so many of us. Our pangolin is 7" long x 3" tall in hard rubber.

Bored With Your Slime?

We feel your ennui. You need a little glitter in your life, and in your slime. This 7-1/2" x 2" clear plastic bottle has a spiral shape for added excitement, and contains 14 oz of what our Technical Specifications Director says is "your solidier, bouncy type slime, not runny like nose gloop." You'll get glittery purple (light or dark), orange or green, and you'll what you get because, well, it's glittery slime.

Not Silly Putty

This is the opposite: Angry Putty™. Turns your frustration into innocent amusement and relaxation. Through some kind of ingenious science formula, the putty builds resistance as you knead it, thereby absorbing your tension. The putty gets more tense with each stretch, and you become all loosey-goosey, like a bowl of blissed-out tapiooca. Our each is a 4" dia tin. Rated five stars by the AS&S Anger Management Department. **! WARNING: CHOKING HAZARD—Small Parts. Not for children under 3 yrs.**

Make A Good Impression

Natural Impressions™ are (30)-gram tins—a tad over (1) oz—of sculpting putty made specially to create terrain for your diorama, model train layout, or little universe all your own. Each tin includes a roller for texture with a small, appropriate stamp on the end. You pick: the Wild River putty is blue, with a roller that creates 3D water drops, and a stamp for making tiny frogs; the Desert Dune putty is tan with a roller that creates 3D sand dunes, and a stamp for camels; and the Rainforest putty is a shimmering green with a roller that creates, well, a rainforest, and has a stamp to make monkeys, because what's a rainforest without monkeys? **! Bouncy & Glows In The Dark

Hey, that's like a frog that swallowed a flashlight. But also this kneadable and stretchy lab putty, which is puttier than slime and glows really brightly. Did we mention it's bouncy? It comes in a tin, approx 3" dia x 1" deep, like shoe polish, except it's more fun than shoe polish. Might even be more fun than a barrel of monkeys, but it depends on the monkeys. **! This nice mini-brick maritime building kit comes in a giant egg and no, we don't know why. (Maybe a roe joke?) Inside the 8-1/2" tall golden egg you'll find (237) pieces to build a hammerhead shark, hippocampus (sea horse), sea lion, dolphin, lobster and crab—or put all the pieces together and make a giant shark. Underpants In A Can!

Emergency underpants in a can. Says it all, doesn't it? Quite stretchable in a Tyvekish white fabric, "one pair fits most adults." They're hip-hugger, semi-bikini, translucent type drawers, so despite the smiling man wearing them and a red bow-tie on the can, some (insecure) guys might find these just a touch jeune fille-ish. "Safe, Sanitary, Secure." Says so right on the 3" x 1-1/2" x 2/3" flip-top metal can. Better buy (3) in case of a long weekend.

Squeeze this squishy version of the eight-legged tardigrade, aka moss piglet, aka water bear, and it takes up to (9) seconds to slowly morph back into shape while you feel your stress disappear like the cashews in a bowl of mixed nuts. Measures 4-1/2" long in green with the squeezability of a marshmallow. You probably don't even know you need it, but you'll know you needed it once you start squeezing it.

Hialeah At Home

Ten furlongs are condensed to (7) inches, with very small horses, in the Desktop Derby, a 6-horse straight track that lets you win money while you teach the children the evils of pari-mutuel betting. The electric track pulsates and moves the nags along at a pace of about 45 seconds per race, with heart-stopping lead changes. The best part is that they're un-handicapable: a different horse, in a different lane, seems to win every time. Measures 9-7/8" x 3-1/2" x 2" high and runs off (2) "AA" batteries, included. **! Know Your Hawaiian Puns

If you're us, and you see a board game named Wanna Hocka Lugie, you can't really pass it up—even if you suspect it might not be authentically Hawaiian. Square Cases

In several senses. These snazzy cigarette cases are made for the original, unfiltered short smokes (or roll-ups) and measure 3-1/2" square x 3/4" deep, or 3/8" deep per side when open, with those little elastic keeper bands. Quite suitable for carrying other stuff like business and debit cards, cash and bus passes. Plus, they make you feel like William Powell or Myrna Loy, depending. In gray, black, and zebra, all with an acrylic mirror on one side and a push-button latch. We'll pick, cuz they're all Thin-Man stylish.

Suck That Air Out!

For space-saving storage (for anything soft and squoosable), we suggest this 5-pack of 20" x 28" vacuum-seal storage bags, into which you can stuff pillows and blankets and sweaters and overcoats and stuffed monkeys and any number of other things, then suck out all the air with the enclosed hand pump and watch it shrink by 80% so you can slide it under your bed and forget about it for mold and moth-free years. Also dandy for travel because the little sucker doesn't take up much space, so you can shrink your return laundry too--and keep it hermetically sealed.

It's like a pen with switchbacks in it, and the coolest part is, your phone fits into the switchbacks. Confused? Chinex??

Rejoice, we have finally found a source of reasonably priced borosilicate glass. This is the kind of glass in the trade marked Pyrex™ and Kimex™ labware. The stuff you can put right over the flame of the Bunsen burner, or directly onto the hot plate. This stuff is imported from China, and is considered student grade, which is good enough for anything but the most exotic applications. Compare the prices below and you will see that they are around half the U.S. equivalent. Call us for larger quantity prices. All are graduated except the test tubes.

Well then, you'll need a little light military bag in olive drab cotton, from Bulgaria. Has a flap with an adjustable buckle strap to hold it down, and an adjustable buckled shoulder strap to sling over your shoulder. Measures 12" x 11" x 2-1/2". Might have a touch of schmutz, which is just proof of its surplus-ness, of course, but it's cotton, so pop it in the wash.

Schutzbrillen!

German safety goggles. Good for "sonne, winde und staub," they say, and by staub they mean dust. These are gray rubber with a little, tinted sun visor that snaps on or off, an adjustable elastic strap and removable clear lenses. Lightly used, although if the thin foam padding around the eyes is deteriorated, it's easily removed. Measure approx 8" x 4".

Survival Jewelry

Survival bracelets, actually. These are braided paracord, and quite attractive, but unbraided them and you've got (7) feet of military grade (per the mfr) paracord with a safe working load of 100 lbs and a max working load of 550 lbs. Bracelet closes with black snap closures. Mildew and abrasion resistant. In black, royal blue, red, purple-ish gray with black edges, and camo. We'll pick, but order two or more and we'll try to send different colors.

47001 Survival Bracelet \$2.50/each

Fishnets

Not fishnet stockings, but netting for actual fish, direct from the U.S. Army (you'd think Navy, wouldn't you?) in olive drab. It's a survival thing. You get a 10-foot x 5-foot net made of 3/4" squares individually knotted from twisted cotton/nylon, so the net won't unravel if torn. Might have a slightly musty aroma (but definitely not fishy) that a little sunshine time will fix. Great for maritime-theme decoration, bible-camp plays (filled until breaking, walking-on-water background prop...) or, we suppose, fishing. And perfect if you want to go to a costume party as Poseidon.

There's nothing like a German leather sling. At least that's what somebody told us once. We've got some great ones, approx 53" long x 1" wide with a friction buckle on one end, and a tab with a stud on the other. The leather is brown and pliable, with a genuine patina. Great for classic, vintage home decor, or for actually slinging something.

Made For Chinese Chests

From the Chinese military, this olive drab canvas recon chest rig is made for carrying SKS rounds. We think it'd also be great for fishing lures, balloons (if you're a balloon artist or a water-balloon tosser), various nails and screws, bolts and washers and probably a hundred other uses. Business part measures 24" wide x 5-3/4" with (6) 4-1/4" deep pockets, (2) at 2" wide and (4) at 1-1/2" wide, all with flaps that close with little plastic clips. The stainless steel stand stands 10" tall with a pair of (5)-oz oil and vinegar cruets, plus salt and pepper shakers. The wine carafe (l) holds (33) oz, enough for a liter of your house Dolcetto. Needless to say, the logo is molto cool.

I Will Survive...

You will survive, too, just like Gloria Gaynor, and in the woods, even. But only if you have this U.S. Army manual, cleverly titled: SURVIVAL, Department of the Army Field Manual FM21-76. It's 287 heavily illustrated pages of techniques for staying alive (add your own BeeGee jokes here) including orientation; food & cooking; fire- and shelter-making; rafts; animal, insect and plant recognition; and much more. This is the 1970 edition, but staying alive in the woods hasn't changed a whole lot since then. In soft-cover.

Oh, Boy

In 1958, Buddy Holly came out of radios like these. This retro version of the first transistory radios measures 4-1/4" x 2-1/2" x 1" in dark blue with a wire handle that doubles as an antenna. AM works better than the FM, but who listened to FM in 1958? Plenty loud with classic thumb-wheel tuning and volume. You add a pair of "AAA" batteries. To make things even more like 1958, carry the radio in your shirt pocket.

Go Hollywood

It's the Hollywood Selfie Pole Monopod, and the name alone is making us go all soft in the middle. Starts out 8-1/2" long and extends to a very sturdy 39" with a camera thread at the end to hold the cell-phone holder. And like many people in Hollywoodland, it probably won't work as intended. The handle was meant to recharge with the included USB cord and connect to your phone with Bluetooth, however we've found that the non-replaceable batteries are mostly non-working or only hold a charge for a few minutes, like a faded actor's career. Sold for the robust stick itself because your arms aren't long enough. And you can always repurpose it for long distant tasks.

Clip-On Readers

These are like those magnifying reading glasses you buy in the drug store and keep losing, except these clip onto your regular glasses. Mighty handy for general reading, but especially for folks whose bifocals won't work for seeing a computer screen because it's too close for the top and too far for the bottom. Acrylic lenses flip up when not in use, and the spring-loaded clip has rubber tips to protect your regular glasses. Mag power is 2.50X and the lenses are large at 2-1/4" across.

A Pyramid of Prisms

Polished glass equilateral prisms. Equilateral because each edge of the end is the same length, 32mm. Thus, as all you geometry students know, each of the angles is also the same, 60 degrees. These are school grade and are fine for decorative and demonstration. They do a nice job of refracting light to produce a nice rainbow-like spectrum, but are definitely not up to instrumentation standards. The missing dimension, length, is shown below.

Bend Light For the Memories

There's optical science and high school physics, and then there's making pretty colors with this little 4-1/2" x about 1" acrylic prism. It makes the same rainbows that the beveled edges on the glass in the French doors to your grandmother's living room used to make on the floor in the afternoon while she was making supper. If you had a grandmother with French doors with beveled glass, who made you supper. If not, you'd better buy this prism or you won't have anything to remember after she's gone.

Beauteous Brass Sextant

Sextants came along after astrolabes but before GPS. (Just like you.) They're used for finding latitude and the distance between objects, and are still the non-electric, non-satellite-dependent back-up for navigators. Ours is a beauty in solid brass with glass optical components, at a tiny price. Measures approx 4-5/8" x 4-1/4" x 3-1/4" OA and comes in a very nice wooden case. Includes instructions for use, which you're going to need unless you went to Annapolis where they still teach it because computers can still go all kaffooley. (Note that well before computers started going kaffooley, compasses and sextants lost an adventurer here and there, too, so don't call us if you and the sextant set out for Madagascar and end up in Iceland.)

The Egg And You

You know, like The Egg and I, the 1947 movie starring Fred MacMurray and Claudette Colbert? Never mind—we were stuck for an egg headline. Just get this Crackin' Eggs™ set, a microwave egg-cooking system that includes one large and two small plastic egg cookers with double walls to save your delicate fingers. Includes a bunch of recipes including "perfect poached" and "super quick scrambled," but we're in love with the pizza scrambled eggs, pancetta egg cup, and most of all with the green eggs and ham. Also mini frittatas and the side-orders: bacon and mushrooms and baked beans. Yes, of course it's been seen on TV but so was Fred MacMurray with his three sons.

Fooooooooooooooooooooooooork

This is a stand 4-tine fork with a non-slip handle to prevent fork tragedies, except that if you pull the end, it extends like an antenna from 10" to over 2 feet long. Called *The Moocher*, it's made for stealing food from your extended family's plates. Across the table. But seriously, it's quite solid even when fully extended, so we'd roast wienies or marshmallows with it, or toast crumpets in the fireplace in our Oxford digs if we ever get a Rhodes Scholarship.

Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. It works, but it's not any more than moderately well made, and not any more than moderately priced. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Children are fascinated by the bobbing bird, and the educational possibilities are great. But they should watch him, not fondle him!! Manufacturer warning states this item is not intended for children 8 and under. **WARNING: CHOKING HAZARD—Small Parts.** Not for children under 3 yrs.

Penstyluslevelrulerdriver

It's a ninefer. This 6" long x 1/2" hex ball-point pen has a rubber stylus at the other end, which unscrews to reveal a tiny driver with both small Phillips and regular heads, while the shaft has a little bubble level and (4) rulers: 0-4" x 1/16"; 0-10cm x 1mm; and both 1/200mm and 1/300mm rulers. The ninth part is our name on the side, so you remember where the coolest stuff comes from. Plus it's in the ruler shade of yellow, with a pocket clip. Need more ink? Our refill pack is a set of (2) black and (2) blue cartridges. Just pull out the silver knurled tip of the pen to screw in a new ink cartridge and your Great American Novel will be finished in no time.

SURPRISE!

Mystery boxes of stuff like what you see in the catalog. Maybe we had a little left but not enough to continue the listing. Maybe we only got a few as part of an odd lot. Maybe we lost some, and just found them in the warehouse. You will get items which originally listed for at least \$25.00 total in our catalog (or would have, if we had enough). You pick. The "electro-mechanical" box has things like motors, switches, hardware and components that are useful parts but want to be worked into something bigger. The "consumer" box has more ready-to-go type items, and things that don't have as technical a flavor, like bottles, toys, books, and giant rubber bands. The fun is in the mystery and surprise. Every couple of months the contents will keep changing, so even if you have gotten a box before, feel free to order again!!

Get Ahead

In fact, get ahead with this particular head. You can practice your cosmetology skills on a face that won't scream if the tweezers go amiss. From BHD Beauty, this practice head is silicone rubber, approx 10" x 6-1/4" x 5-1/2", with a flat back so it won't roll away on you when you set it flat on a table. Great for eyelash extension, makeup practice, facial massage or painting, and easy to clean using professional cleansing oil. You could also just hang it on the wall for a nice, creepy interior design effect. Pat says, "Hey—no weird smell!" which isn't always the case in the surplus game, or the rubber model practice head game.

Back To The Back Scratcher

It's back. Once upon a carnival, the bamboo back scratcher was the prize every kid came home with and there wasn't an unscratched back in America—unless the kid came home with a goldfish, which are worthless for scratching backs. Now you can return to those thrilling days of yesteryear with our high-quality, 19" long bamboo back scratcher, and you don't even have to go to a carnival to get it.

Now go click on it, and we'll beam it to you via USPS, warp-speed.

Copper Is The New Kale

In flexible copper, 6-5/8" x 7/16" x 1/16" with 3/16" dia magnets on the ends, this bracelet is flexible enough to fit all wrists. Might be good for you, might just look good. Front of the package says the combo has been believed to relieve arthritis and rheumatism since Roman times but the back says it's definitely not a medical device. F. Scott Fitzgerald said "The test of a first-rate intelligence is the ability to hold two opposed ideas in the mind at the same time." He probably would have bought some of these bracelets.

Mirror flips from standard to 5X (enormous!) in a 360-degree swivel mount. Includes mounting hardware. Better check those ear hairs while you're at it. Finish is oil-rubbed bronze.

Know Any Numbskulls?

Alas, we do, too, and here's another one—made of foam. Quite realistic-looking due to the weathered color and texture, it has most of its teeth, all of its fissures, and deep, creepy eye sockets. A must-have for the Halloween season, productions of Hamlet and Gothic interior design. Very lightweight so it would also work for macabre indoor volleyball. The flat bottom means it will sit right up on your (actual) desktop as a procrastination deterrent.

Blusher Brushes

This kit also has lip gloss, eye shadow, foundation and sundry other things to blend, contour, detail and delight the inner makeup artist in us all. Don't leave home without using it, at least on Saturday night. Our each is a set of (12) brushes, from tiny to wide. Don't know the source, whether they're synthetic or trimmed from the bellies of pampered sables. But they're all as soft as a kindergarten teacher's heart. In silver and copper, and packed in a matching tin case.

Free-Range Soap!

OK, maybe it's not cage-free, but this bar soap is handmade on an Amish farm in Springfield, Missouri, using Abraham Graeber's family recipe, which contains "no cancer-causing chemicals," according to the package. Because this soap is made by people and not machines, it's good for the earth, and has a light wildflower scent too. Our each is (5) giant appx. 5-ounce bars, approx 3-1/2" x 2-3/4" x 1-1/4". (For you youngsters out there, bars of soap are what humans used to use to get clean before there were liquid soap dispensers.)

Radiometer

Another oldie but goodie. 5" high evacuated clear glass stand 3" in diameter at the top. A four bladed vane is balanced on a needle inside the sphere. Because opposite surfaces of the vanes are black and white, incident radiant energy is absorbed or reflected to a different degree. The result is a spinning vane. The brighter the light, the faster it spins. Simple, but compelling. Brief explanatory instruction sheet included.
